PROFESSIONAL SUMMARY

Software engineering student with full-stack internship experience developing scalable web applications, REST APIs, and AI-powered solutions using Node.js, ASP.NET Core MVC, React.js, and Flutter. Experienced in backend development, database design, and building production-oriented software across web, AI, IoT, and XR/AR technologies.

WORK EXPERIENCE

Auvia-TabbeqAI

2025 – 2026

AI & XR/AR Intern

- Built AI-powered AR/XR applications in Unity, implementing object tracking and gesture recognition for robotics and workout-detection use cases.
- Tuned application performance for real-time tracking scenarios, working across Unity, C#, and AR Foundation.

Vanrise

2025

Software Development Intern

- Developed backend features using ASP.NET MVC (C#), built and tested REST APIs using Postman, and collaborated on frontend/backend integration across the application.
- Debugged application issues and optimized database operations, improving application reliability and maintainability.

Ogero Internship

2025

Team Leader — Full-Stack Intern

- Led a team building a full-stack Admin Console with React.js, Node.js, JWT, and RBAC, delivering secure role-based access and database-driven workflows.
- Coordinated task ownership across the team and organized admin operations end-to-end, from database schema to UI.

PROJECTS

Enterprise Web Applications (ASP.NET Core MVC, C#, SQL Server, React.js, Node.js)

- Architected three full-stack platforms (Money Transfer System, Admin Console, and PsyConnect), implementing RBAC across Admin, User, and Agent roles.
- Integrated payment processing and database-driven dashboards, connecting React.js frontends to ASP.NET Core MVC and Node.js backends.

Smart University IoT Platform (Flutter, FastAPI, MongoDB, Raspberry Pi, MQTT)

- Built a cross-platform Flutter application with separate user and administrator interfaces backed by FastAPI and MongoDB.
- Integrated RFID attendance and MQTT-based IoT communication across multiple sensors, exposing REST APIs and real-time dashboards.

Semantic Search Engine (Java, JavaFX, MongoDB)

- Built a semantic document retrieval system supporting PDF, Word, XML, JSON, and HTML documents using NLP-based indexing and relevance ranking.
- Optimized search performance through MongoDB query-history caching.

AI & Computer Vision Applications (Python, TensorFlow, Flask, Unity)

- Developed AI-powered applications including Smart Inventory, Sneaker Detection, workout detection, image compression with autoencoders, and object detection systems.

EDUCATION

Antonine University, Baabda, Lebanon

2027

Bachelor of Engineering in Computer and Communications — Software Engineering and Networks

CORE SKILLS

- Languages:** Java, Python, C++, C#, JavaScript (ES6+), PHP, SQL
- Backend:** Node.js, Express.js, FastAPI, ASP.NET MVC (C#), Laravel, REST APIs, JWT, RBAC
- Databases:** MySQL, MongoDB, PL/SQL, JSON data modeling & optimization
- Frontend:** React.js, HTML5, CSS3
- Software Engineering:** Object-Oriented Programming (OOP), Data Structures & Algorithms
- Mobile & XR:** Flutter, Dart, Unity, AR Foundation, XR Interaction Toolkit
- AI & Computer Vision:** NumPy, TensorFlow, Image Classification, Object Detection, Autoencoders, Data Preprocessing
- IoT & Embedded:** Raspberry Pi, GrovePi, MQTT, RFID, Sensor Integration
- Tools:** Git, GitHub, Postman, Linux, VS Code

CERTIFICATIONS

AI & Machine Learning Course, Antonine University (2024 – 2026); Full-Stack Web Development, Udemy (2024); CCNA Coursework, Antonine University; Cybersecurity Fundamentals, Self-Paced; Linux Fundamentals.

LANGUAGES

Arabic (Native), English (Fluent)
